

Please do not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has greatly reduced the number of irritating sales calls we receive on any given day. We used to receive two to three calls on average per day. Now we receive about one per month. Finally, my kids are able to take naps without a phone call waking them up. My family is able to sit down to dinner without being interrupted by a telephone solicitor. Again, please don't implement any proposal that would take this peace and quiet away from us!
